

## **GrindTec 2020 - 18 - 21 March - Exhibition Centre Augsburg**

### **Press information**

22 February 2019

### **GrindTec 2020: World's leading trade fair in grinding technology increasingly in the focus of international companies**

Augsburg – The 300 registrations for the GrindTec 2020 in just under five months speak for themselves: the leading platform for grinding technology is becoming more and more international. Whereas at the GrindTec 2000 just 15 per cent of the 164 exhibitors came from abroad, most recent figures showed 45% of the 644 companies. The number of countries represented also rose accordingly from 8 to 30! The increasingly intensive development of the markets in Asia has contributed significantly to the internationalisation of the GrindTec at a whole series of trade fairs.

#### **GrindTec: greater presence at international trade fairs**

The GrindTec has developed into a known factor in the world of grinding technology. Whether at the Cimes in Beijing, the IMTS in Chicago or the IMTEX in Bangalore – wherever the AFAG and the FDPW are at work, the GrindTec is known and appreciated as the leading trade fair in the branch. In the near future the organizer and sponsor will be presenting the GrindTec from 18 – 20 March 2019 in the lecture forum at the Grinding Technology in Tokyo. And it will have a booth of its own for the first time.

#### **Even more service for exhibitors and visitors**

Although a whole range of new hotels in Augsburg will be available in the coming years, there will always be exhibitors and visitors who prefer staying in nearby Munich. They will now be pleased about a further shuttle bus line. From 17 – 21 March an additional bus will run between the centre of Munich (bus station) and the exhibition centre in Augsburg. The Munich airport has already been long connected with Augsburg via a shuttle bus line. (Timetables at [www.grindtec.de](http://www.grindtec.de)).
